

REMARKS

Applicant respectfully requests reconsideration of the present application in view of the reasons that follow. Applicant respectfully requests that the foregoing amendments be entered at least because they are only to improve the readability of claim 1, and do not raise any new issues requiring further search or consideration.

Claim 1 is currently being amended. The amendment to claim 1 is to improve its readability and does not change its scope. No new matter is being added.

This amendment changes claims in this application. A detailed listing of all claims that are, or were, in the application, irrespective of whether the claim(s) remain under examination in the application, is presented, with an appropriate defined status identifier.

After amending the claims as set forth above, claims 1-8 and 12-18 are now pending in this application.

Foreign priority

Applicant again respectfully requests the Examiner to acknowledge applicant's claim to foreign priority.

Allowable subject matter

Applicant appreciates the indication that claims 1-8 are allowed.

Rejection under 35 U.S.C. § 102

Claims 12-18 stand rejected under 35 U.S.C. § 102(b) as being anticipated by U.S. Patent No. 6,265,783 to Juso ("Juso"). Applicant respectfully traverses this rejection for at least the following reasons.

Independent claim 12 recites "a dummy bump electrode formed above said insulating layer, and connected to associated one of said plurality of external bump electrodes." Juso fails to disclose or suggest at least this feature of claim 12 in the context of that claim.

Juso discloses a device with an interconnection protective film 7, lands 10, and dummy lands 11 (See Figure 1). External connection terminals 4, formed as solder balls, are

connected to respective of the lands 10, but not to the dummy lands 11 in the device of Figure 1 (col. 5, lines 14-22). Juso also discloses an embodiment where the “dummy lands 11 are utilized to partly form signal interconnections as shown in FIG. 5(b).” (col. 6, lines 42-43).

In contrast to the device of claim 12, however, Juso does not disclose a dummy bump electrode, much less a dummy bump electrode in the arrangement recited. The Office Action equates the dummy lands 11 with the dummy bump electrode of claim 12. The dummy lands 11, however, are not bump electrodes. While the external connection terminals 4, to which the lands 10 are connected, are formed as solder balls, and thus might be considered to be bump electrodes, the dummy lands 11 are of a similar size and shape to the lands 10, and are not of a shape to be considered to be bump electrodes. Thus, Juso, failing to disclose the bump electrodes of claim 12, fails to anticipate that claim.

Dependent claims 13-18 ultimately depend from claim 12, and are patentable for at least the same reasons as well as for further patentable features recited therein.

Applicant believes that the present application is now in condition for allowance. Favorable reconsideration of the application as amended is respectfully requested.

The Examiner is invited to contact the undersigned by telephone if it is felt that a telephone interview would advance the prosecution of the present application.

The Commissioner is hereby authorized to charge any additional fees which may be required regarding this application under 37 C.F.R. §§ 1.16-1.17, or credit any overpayment, to Deposit Account No. 19-0741. Should no proper payment be enclosed herewith, as by a check being in the wrong amount, unsigned, post-dated, otherwise improper or informal or even entirely missing, the Commissioner is authorized to charge the unpaid amount to

Deposit Account No. 19-0741. If any extensions of time are needed for timely acceptance of papers submitted herewith, Applicant hereby petitions for such extension under 37 C.F.R. § 1.136 and authorizes payment of any such extensions fees to Deposit Account No. 19-0741.

Respectfully submitted,
